### VALHI REPORTS SECOND QUARTER 2013 RESULTS

DALLAS, TEXAS . . August 9, 2013. Valhi, Inc. (NYSE: VHI) reported a loss from continuing operations attributable to Valhi stockholders of \$39.7 million, or \$.12 per diluted share, in the second quarter of 2013 compared to income from continuing operations attributable to Valhi stockholders of \$43.8 million, or \$.13 per diluted share, in the second quarter of 2012. For the first six months of 2013, Valhi reported a net loss from continuing operations attributable to Valhi stockholders of \$79.5 million, or \$.23 per diluted share, compared to net income from continuing operations attributable to Valhi stockholders of \$132.2 million, or \$.39 per diluted share. Changes in reported net income attributable to Valhi stockholders are primarily due to changes in operating results in the Company's Chemicals Segment.

The Chemicals Segment's net sales of \$481.1 million in the second quarter of 2013 were \$64.2 million, or 12%, lower than in the second quarter of 2012. Net sales of \$944.7 million in the first six months of 2013 were \$161.9 million, or 15%, lower than in the first six months of 2012. The Chemicals Segment's net sales decreased in the second quarter and first six months of 2013 primarily due to lower average TiO<sub>2</sub> selling prices partially offset by higher sales volumes. The Chemicals Segment's average TiO<sub>2</sub> selling prices decreased 24% in the second quarter of 2013 as compared to the second quarter of 2012, and decreased 22% in the first six months of the year as compared to the same prior year period. The Chemicals Segment's average TiO<sub>2</sub> selling prices at the end of the second quarter of 2013 were 1% lower than at the end of the first quarter of 2013 and 8% lower than at the end of 2012. TiO<sub>2</sub> sales volumes in the second quarter and first six months of 2013 were approximately 17% and 9% higher, respectively, than in the comparable periods of 2012 due to higher customer demand primarily in certain export and European markets. The Chemicals Segment's sales volumes in the first half of 2013 set a new record for a first-half year. Fluctuations in currency exchange rates also impacted net sales, decreasing net sales by approximately \$3 million in the second quarter and approximately \$2 million in the first six months of 2013. The table at the end of this press release shows how each of these items impacted the overall decrease in sales.

The Chemicals Segment's operating loss in the second quarter of 2013 was \$45.3 million as compared to operating income of \$112.4 million in the second quarter of 2012. The Chemicals Segment's operating income declined in the second quarter of 2013 primarily due to the net effects of lower average TiO<sub>2</sub> selling prices, higher raw materials costs, higher sales volumes and higher production volumes. For the year-to-date period, the Chemicals Segment's operating loss was \$90.4 million compared with operating income of \$323.7 million in the first six months of 2012. The Chemicals Segment's operating income for the year-to-date 2013 period decreased due to the net effects of lower average TiO<sub>2</sub> selling prices, higher raw materials costs, higher sales volumes and lower production volumes. The Chemicals Segment's cost of sales per metric ton of TiO<sub>2</sub> sold in the first half of 2013 was significantly higher than TiO<sub>2</sub> sold in the first half of 2012, as a substantial portion of the TiO<sub>2</sub> products sold in the first quarter of 2013 (and a portion of the TiO<sub>2</sub> products sold in the second quarter of 2013) was produced with significantly higher-cost feedstock ore purchased in 2012. The Chemicals Segment's TiO<sub>2</sub> production volumes were 5% higher in the second quarter of 2013 as compared to the second quarter of 2012, and were 5% lower in the year-to-date period. During the first half of 2013, the Chemicals Segment's operated its facilities at approximately 91% of practical capacity primarily to align production and inventory levels to current and anticipated near-term customer demand levels. Operating income comparisons were also impacted by the effects of fluctuations in currency exchange rates, which decreased segment profit by approximately \$2 million in the second quarter and decreased segment profit by approximately \$8 million in the year-to-date period.

---

The Component Products Segment's net sales increased 9% in the second quarter of 2013 as compared to the second quarter 2012 and 7% in the first six months of 2013 as compared to the same period of 2012. Net sales increased principally due to higher postal market demand within security products and to a lesser extent an increase in marine components sales outside of the high performance boat market through gains in market share. The Component Products Segment's operating income from continuing operations increased from \$2.1 million in the second quarter of 2012 to \$2.9 million in the second quarter of 2013 and from \$3.7 million in the first six months of 2013 to \$4.4 million in the same period of 2013.

The Waste Management Segment's sales increased significantly in the second quarter and first six months of 2013 compared to 2012, as we began routinely accepting low-level radioactive waste ("LLRW") for disposal at the recently-completed Compact LLRW disposal facility during the second half of 2012, and we accepted our first LLRW for disposal at the new Federal LLRW disposal facility late in the second quarter of 2013. We recognized a positive gross margin in the second quarter of 2013 as compared to 2012 as a result of increased sales. The Waste Management Segment's operating loss was lower in the second quarter and first six months of 2013 compared to 2012 due to increased sales; however it still recognized an operating loss in both periods of 2013 because Waste Management has not yet achieved sufficient revenues to offset the high cost structure associated with operating under its byproduct and LLRW disposal licenses relative to the waste treatment and disposal volumes to date. The Waste Management Segment received a national disposal contract for its Federal LLRW facility in April 2013. The contract is for a period of five years and up to \$300 million. WCS received its first federal waste for disposal in the latter part of the second quarter of 2013.

As previously reported, in February 2013, the Chemicals Segment voluntarily prepaid an aggregate \$290 million principal amount under its \$400 million term loan, using \$100 million of available cash as well as borrowings of \$190 million under a new loan from Contran Corporation, our parent company. As a result of such prepayment, the Company's results in the first quarter of 2013 include a pre-tax charge of \$6.6 million (\$3.4 million, or \$.01 per share, net of income tax benefit and noncontrolling interest), consisting of the write-off of unamortized original issue discount and deferred financing costs associated with such prepayment. As previously reported, in June 2012, the Chemicals Segment entered into a new \$400 million term loan, and used a portion of the net proceeds to redeem the remaining €279.2 million principal amount outstanding of its 6.5% Senior Secured Notes due April 2013. As a result, the Company recognized a second quarter 2012 charge of \$7.2 million (\$3.7 million or \$.01 per share net of income tax and noncontrolling interest benefit) associated with the early extinguishment of such remaining Senior Notes.

---

Corporate expenses were 132% higher at \$21.6 million in the second quarter of 2013 compared to \$9.2 million in the same period in 2012, primarily due to higher environmental remediation and related costs in the second quarter of 2013. Corporate expenses were 5% higher at \$31.3 million in the first six months of 2013 compared to \$29.5 million in the same period in 2012.

In December 2012, the Company completed the sale of the Component Products Segment's furniture components operations to a competitor. The Company has reclassified its Condensed Consolidated Statement of Operations to reflect the disposed business as discontinued operations for the 2012 periods.

The statements in this press release relating to matters that are not historical facts are forward-looking statements that represent management's beliefs and assumptions based on currently available information. Although the Company believes the expectations reflected in such forward-looking statements are reasonable, it cannot give any assurances that these expectations will be correct. Such statements by their nature involve substantial risks and uncertainties that could significantly impact expected results, and actual future results could differ materially from those predicted. While it is not possible to identify all factors, the Company continues to face many risks and uncertainties. Among the factors that could cause our actual future results to differ materially include, but are not limited to, the following:

- Future supply and demand for our products;
- The extent of the dependence of certain of our businesses on certain market sectors;
- The cyclical nature of certain of our businesses (such as Kronos' titanium dioxide pigment ("TiO<sub>2</sub>") operations);
- Customer and producer inventory levels;
- Unexpected or earlier-than-expected industry expansion;
- Changes in raw material and other operating costs (such as energy, ore and steel costs) and our ability to pass those costs on to our customers or offset them with reductions in other operating costs;
- Changes in the availability of raw materials (such as ore);
- General global economic and political conditions (such as changes in the level of gross domestic product in various regions of the world and the impact of such changes on demand for, among other things, TiO<sub>2</sub> and component products);
- Competitive products and prices, including increased competition from low-cost manufacturing sources (such as China);
- Possible disruption of our business or increases in the cost of doing business resulting from terrorist activities or global conflicts;
- Customer and competitor strategies;
- Potential consolidation of our competitors;
- Potential consolidation of our customers;
- The impact of pricing and production decisions;
- Competitive technology positions;
- The introduction of trade barriers;
- The ability of our subsidiaries to pay us dividends;
- The impact of current or future government regulations (including employee healthcare benefit related regulations);
- Uncertainties associated with new product development and the development of new product features;
- Fluctuations in currency exchange rates (such as changes in the exchange rate between the U.S. dollar and each of the euro, the Norwegian krone, and the Canadian dollar) or possible disruptions to our business resulting from potential instability resulting from uncertainties associated with the euro;
- Operating interruptions (including, but not limited to, labor disputes, leaks, natural disasters, fires, explosions, unscheduled or unplanned downtime and transportation interruptions);
- The timing and amounts of insurance recoveries;
- Our ability to renew, amend, refinance or establish credit facilities;
- Our ability to maintain sufficient liquidity;
- The ultimate outcome of income tax audits, tax settlement initiatives or other tax matters;
- Our ultimate ability to utilize income tax attributes or changes in income tax rates related to such attributes, the benefits of which have been recognized under the more-likely-than-not recognition criteria (such as Kronos' ability to utilize its German net operating loss carryforwards);
- Environmental matters (such as those requiring compliance with emission and discharge standards for existing and new facilities, or new developments regarding environmental remediation at sites related to our former operations);
- Government laws and regulations and possible changes therein (such as changes in government regulations which might impose various obligations on former manufacturers of lead pigment and lead-based paint, including NL, with respect to asserted health concerns associated with the use of such products);
- The ultimate resolution of pending litigation (such as NL's lead pigment litigation, environmental and other litigation and Kronos' class action litigation);
- Our ability to comply with covenants contained in our revolving bank credit facilities;
- Our ability to complete and comply with the conditions of our licenses and permits;
- Our ability to successfully defend against currently-pending or possible future challenge to WCS' operating licenses and permits; and
- Possible future litigation.

Should one or more of these risks materialize (or the consequences of such development worsen), or should the underlying assumptions prove incorrect, actual results could differ materially from those currently forecasted or expected. We disclaim any intention or obligation to update or revise any forward-looking statement whether as a result of changes in information, future events or otherwise.

Valhi, Inc. is engaged in the titanium dioxide pigments, component products (security products and high performance marine components) and waste management industries.
